# Word-Level AutoCompletion

**Goal:** Given a sentence to translate, and some translation context, auto-complete the word that the user is typing.

## Word-Level AutoCompletion

**Goal:** Given a sentence to translate, and some translation context, auto-complete the word that the user is typing.

Source: *Wir haben die Meinung von zwei Fachärzten eingeholt.*

Target translation: *We asked two specialists for their opinions.*

We sp their opinions

## Word-Level AutoCompletion

**Goal:** Given a sentence to translate, and some translation context, auto-complete the word that the user is typing.

Source: *Wir haben die Meinung von zwei Fachärzten eingeholt.*

Target translation: *We asked two specialists for their opinions.*

We sp their opinions

## Word-Level AutoCompletion

**Goal:** Given a sentence to translate, and some translation context, auto-complete the word that the user is typing.

Source: *Wir haben die Meinung von zwei Fachärzten eingeholt.*

Target translation: *We asked two specialists for their opinions.*

We sp their opinions

## Word-Level AutoCompletion

**Goal:** Given a sentence to translate, and some translation context, auto-complete the word that the user is typing.

Source: *Wir haben die Meinung von zwei Fachärzten eingeholt.*

Target translation: *We asked two specialists for their opinions.*

We **specialists** their opinions

## Context

- **Left context:** a sequence of consecutive translated words, located somewhere before the word to autocomplete. It does not have to start at the beginning of the sentence.
- **Right context:** a sequence of consecutive translated words, located somewhere after the word to autocomplete. It does not have to end at the ending of the sentence.

## Context

- **Left context:** a sequence of consecutive translated words, located somewhere before the word to autocomplete. It does not have to start at the beginning of the sentence.
- **Right context:** a sequence of consecutive translated words, located somewhere after the word to autocomplete. It does not have to end at the ending of the sentence.

Each case can have the following context scenarios:

- Zero context.
- Left context.
- Right context.
- Bi-context.

# Outline

1. Word-Level AutoCompletion
2. Segment-based Interactive Machine Translation
3. Approach

# Interactive Machine Translation

**Goal:** collaborative framework in which human and machine work together to produce the final high-quality translations.

# Segment-based Interactive Machine Translation

**Source:** la commission a constaté que les mesures relatives aux contrats temporaires inférieurs à deux ans

**Target translation:** the commission finds that the measures relating to temporary contracts of less than two years duration

the commission found that the measures relating to  
contracts temporaires inférieurs bourses to two years

# Segment-based Interactive Machine Translation

**Source:** la commission a constaté que les mesures relatives aux contrats temporaires inférieurs à deux ans

**Target translation:** the commission finds that the measures relating to temporary contracts of less than two years duration
